# The project management.

How to build risk measures.

- Resources and how to take care of them because they are the project.
- Tasks and how to organize them and build reliable indicators.
- Budget and how to make sure it's tightly managed.
- The Calendar that help you see the future of your project.
- The Risks and their criticality.
- The deliverables that you will be able to sell to get more budget.
- The tools that you need to masterize to build the project and organize it
- The tools that you need to masterize to build the project and organize it

You can create overlays. . .

- using the `pause` command:
  - First item.
  - Second item.
- using overlay specifications:
  - First item.
  - Second item.
- using the general `uncover` command:
  - First item.
  - Second item.
